UBIqube Solutions to present new products at 2009 Gitex edition

UBIqube Solutions, the global supplier of converged network, IT security and VoIP management solutions, that provide telecom operators and system integrators with a suite of modular and scalable Service Delivery tools for their Managed Services offerings, announced its participation at Gitex Dubai 2009.

An enterprise Suite is also available for large organizations seeking to streamline their IT management and introduce service oriented practices in their IT, IT security and VoIP management domains.

From October 18th to 22nd, 2009, during Gitex in Dubai, UBIqube Solutions will be exhibiting their new products: MSActivator and SmartSOC.

MSActivator:

MSActivator is the corner stone of UBIqube' Service Provider Solutions Suite. As a next generation Service Delivery platform, it is key to Service Providers, System Integrators, and MSSPs launching integrated managed network and security services.

The MSActivator converged solution features full service lifecycle management from staging, provisioning, ITIL based configuration, and asset management. It is designed to be integrated into a Service Provider's existing BSS/OSS/CRM environment.

The MSActivator services portfolio is enabled over routers, Firewalls, UTMs, etc. Services activated range from VPN, VoIP, to a complete suite of security specific services (Firewall, IDS/IPS, Content filtering, monitoring, etc.).

The MSActivator allows the Service Provider Managed Services portfolio to expand beyond the traditional range, unifying network, security, VoIP services.

MSActivator Benefits:

- * Converged Network, Security and VoIP management
- * Enables broadened Managed services portfolio
- * Increases addressable market
- * Streamlined service provisioning
- * Unified web portal for provisioning, monitoring and reporting
- * Carrier class, scalable and multi-tenant architecture
- * Device and vendor agnostic

- * Features appliance based management proxy for customers requiring on site depository

SmartSOC:

The UBlqube SmartSOC is a unique, converged Network, Security and VoIP lifecycle management solution.

The SmartSOC bridges the gap between Network, Security and VoIP management. This appliance will provide IT managers with a single solution for device provisioning, change management, security policy implementation, asset management, log archiving, security reporting, and monitoring. Through automation it streamlines the IT managers' tasks and reduces complexity for greater efficiency, security and compliancy.

The SmartSOC eliminates the need for vendor specific device management software and provides holistic security monitoring and reporting capabilities.

A SmartSOC customer will benefit from a single web based GUI (VSOC) to control all stages of network and security lifecycle management.

SmartSOC Benefits:

- * Reduce IT operational cost linked to multi-vendor lifecycle management
- * Improve network, security and VoIP management efficiency
- * Improve incident response time
- * Increase network availability
- * Demonstrate compliancy.

About UBlqube Solutions:

UBlqube Solutions is a global supplier of converged network, IT security and VoIP management solutions that provide telecom operators and system integrators with a suite of modular and scalable Service Delivery tools for their Managed Services offerings. An enterprise Suite is also available for large organizations seeking to streamline their IT management and introduce service oriented practices in their IT, IT security and VoIP management domains.

UBlqube's technology was started in 2000 as a spin-off of the R&D division of France Telecom, a major global telecommunications company serving more than 180 million customers in 30 countries. UBlqube Solutions was incorporated in 2006 to take its innovative management platform to market globally.

Head Quartered in Paris, the company's engineering operations are located in the technology-rich Grenoble area, and it has sales presence in Europe, Russia and the Commonwealth of Independent States (CIS), the United States, Dubai and Hong Kong.

UBlqube is a Cisco CTDP Partner. UBlqube is also a Red Herring Global 100 technology winner in 2008.
