## **ONLANTA will use UBIqube's technology to provide enhanced Managed Services to its corporate customers.**

Paris, *UBIqube Solutions* ([www.ubiqube.com](http://www.ubiqube.com)) a global integrated network and security management solution vendor will be the foundation for ONLANTA ([www.onlanta.ru](http://www.onlanta.ru)), part of Lanit - a large multi-profile IT holding, providing a wide range of IT services throughout Russia and CIS, to launch an innovative offer of managed services to their corporate customers.

*UBIqube's* MSActivator™ solution, flexibility, scalability, intuitive GUI and extensive features has propelled it to the top of ONLANTA's list as the best choice to provide their customer base with a large range of managed services.

ONLANTA will now be able to offer advanced Managed Services based on leading appliances. Enterprises, SMBs and large, are more and more exposed to IT security threats; nowadays, the IT Managers need to use one centralized tool for managing the increasing numbers of CPE devices, to reduce opex in this crisis time, to improve the network and security management efficiency and to increase network availability... By using *UBIqube's* MSActivator™ solution, ONLANTA can now offer its customers a complete suite of services for device provisioning, configuration management, monitoring and reporting. Supported services include Managed VPN Firewall, IDS/IPS, Anti-Virus, URL Filtering, and Anti-Spam.

"In selecting the *UBIqube* MSActivator™ solution, the most important issue was the competence, experience and ability to offer a managing solution to our customers and to provide a steady stream of high margin revenue," says Sergey Taran, CEO of ONLANTA.

"*UBIqube* offers a proven solution at a fraction of the cost. ONLANTA is showing its leadership and vision by taking advantage of our technology to offer a service that will make it the primary choice of security conscious enterprises in Russia/CIS". In term of strategy this partnership is important to reinforce our presence in Russia/CIS and a proof of our positioning as a leader of managed services, says Nabil Souli, chairman of UBIqube Solutions.

### **About UBIqube**

UBIqube is a global integrated network and security management solution vendor

UBIqube Enterprise Solution Suite helps organizations streamline their network and security lifecycle management. As a result, IT departments equipped with UBIqube's innovative SmartSOC™ appliance benefit from reduced complexity, reduced operational cost, and ultimately improved security.

UBIqube Service Provider Solution Suite is the corner stone of a Converged Managed Services offering. A Service Provider NOC/SOC empowered with UBIqube MSActivator™ is set to cost effectively address the Converged Managed Services market opportunity. The inherent flexibility of the MSActivator™ allows for innovative business models and routes to market.
