NEWS RELEASE

Dominion/Halógica, a Dominion international group company and UBIqube Solutions Announce Strategic Partnership to Offer Next-Generation Managed Security Services to Brazilian Telcos and Enterprise Market

PARIS — May, 2010 — UBIqube Solutions, the global integrated network, security and VoIP management solution vendor, and Dominion/Halógica, Brazilian IT and Telecom System Integrator, announced today their partnership to launch a suite of innovative managed security services.

Dominion/Halógica will be able to significantly expand the breadth and depth of its Managed Security Services offering in Brazil with UBIqube's innovative Converged Services Delivery Platform (SDP), MSAActivator™

This partnership will establish Dominion/Halógica's managed security portfolio, a complete suite of services to address their customer's security requirements for Internet access, managed firewall, content filtering, IPS/IDS, VPN, vulnerability scanning, and log management services. UBIqube's converged service delivery platform allows Dominion/Halógica to provide its Telco customers with an end-to-end service management tool for provisioning, advanced reporting, asset management, and monitoring. The result is a streamlined process for fast order fulfillment and cost effective service delivery ensuring a better enterprise managed service experience.

Dominion/Halógica plans to develop a broad suite of managed services to help Telcos address the expanding enterprise customer's need.

"Outsourced managed services are one of the fastest growing area (CAG 20%) in the current economy, particular among small and medium size businesses, and this strategic partnership offers Dominion/Halógica a flexible solution to participate in this growth. Equipped with UBIqube's MSAActivator™, our partners can broaden their addressable markets while reducing their cost for delivering these new services," **said Laton Palmer, VP Sales Americas, UBIqube Solutions**

"The UBIqube solution helps us to simplify our back office Security Operation Center improving our service quality and breadth, all while reducing our service production cost. Dominion/Halógica is set to drive higher quality standards in the Managed Services Industry for the benefit and competitiveness of our customers", **said Oscar Delgado, Director of Commercial Services Dominion/Halógica**

About Dominion/Halógica

Dominion/Halógica is a Dominion company that offers IT solutions in vertical technologies and markets such as industry, utilities, education as well as outsourced services. Headquartered in São Paulo (SP), Halógica has branches in Nova Lima-Minas Gerais (MG). It was the first systems

integrator company in Latin America to get the ISO 20.000, and the first in the world in the T&T area. The company is a certified **Cisco Silver Partner** and has other strategic partnership with companies such as Tandberg, Google, and Quescom. Dominion/Halógica offers both product and solution portfolio based upon two main ideals: IT management and TI Infrastructure services. The first one offers highly- skilled consultants focused on ISO 20.000, service desk hosting, framework supply for IT (HIRIS) service management and implementation of quality processes (HORUS). Concerning the TI infrastructure services, the company has its offer based upon several mini technological factories: videoconferencing communication, security, unified communications, , wireless, routing & switching,. Dominion/Halógica offer support for these products, through consulting, architecture design, and service management.
